March GradFunding - American Bus Association, National Geographic, NASA, and more

Dear Graduate Students,

If you occasionally think, “I should apply to funding someday,” I have good news for you. The Graduate and Professional Student Council grants have an April 1 deadline, and all of you should be eligible to apply for those grants. They are not a huge amount of money, but they are enough to be significant. This is an excellent opportunity. Also, have a look below for additional opportunities that might be a good fit for you.

**Grad Slam Deadline Extended**
Grad Slam is a campus-wide competition for the best 3-minute graduate student presentation of a research or creative project. It is an excellent opportunity for students to enhance their communication skills and is an effective way of showcasing to the UArizona community and the public the innovative research and creative work associated with graduate education at the University of Arizona. All disciplines are encouraged to participate. And did we mention that presenters could win an award of $3,000? Registration is extended through March 6, 2022.

General Funding Opportunities

American Bus Association Academic Merit Scholarships in Transportation, Travel, and Tourism
The ABA Foundation mission is to support the motorcoach travel and tour industry with research and scholarships that benefit the ABA, policymakers and the public. Academic Merit Scholarships are open to both ABA and non-ABA Members. You must be a freshman, sophomore, junior, senior, or graduate student at an accredited university (4-year university/college or junior college). You must have a declared major or course of study relevant to the transportation, travel, and tourism industry. Transportation, travel, and tourism encompass a varying range of professions from accounting to hospitality management and everything in between. In other words, please apply rather than ruling yourself out because of your major. However, you will be required to submit a short essay on how your major or course of study is relevant to the transportation, travel, and tourism industries. You must maintain a minimum GPA of a 3.4 on a 4.0 scale.

Centers for Disease Control and Prevention (CDC) Research Participation Opportunities
This is an open announcement to collect applications for future research opportunities. The Oak Ridge Institute for Science and Education (ORISE) Research Participation Programs at the Centers for Disease Control and Prevention (CDC) are educational and training programs designed to provide students and recent graduates opportunities to participate in project-specific CDC research and developmental activities at CDC facilities that are related to CDC’s mission. Opportunities include full-time, part-time, and summer appointments.
DAAD (German Academic Exchange Service) Short Term Research Grants (graduate and postdocs)

Short-Term Research Grants are awarded for 1-6 months to highly qualified candidates who have completed a master’s degree or diploma, or in exceptional cases a bachelor’s degree at the latest by the time they begin their grant supported research, or those who have already completed a PhD (postdocs). DAAD will provide a monthly stipend (varies based on academic level and cover health insurance and provide a flat rate subsidy for travel costs. In addition, limited funds are available for a rent subsidy and family allowance.

- **Deadline:** May 2, 2022
- **Citizenship:** U.S. or Canadian citizens or permanent residents. Foreign nationals who live in the U.S. or in Canada must have been living in the U.S./Canada for a minimum of one year and have their current residence in the U.S./Canada by the time of the application deadline. All other foreign nationals may need to apply via a different DAAD office.

German Historical Institute Doctoral and Postdoctoral Fellowships

The GHI awards short-term research fellowships to European and North American doctoral students as well as postdoctoral scholars to pursue research projects that draw upon primary sources principally located in North America. We are particularly interested in research projects that fit into the following fields: German and European history, The history of German-American relations, The role of Germany and the USA in international relations, North American history and Pan American, including Mexico, Central America, and the Caribbean (European doctoral and postdoctoral scholars only). The proposed research projects should make use of historical methods and engage with the relevant historiography. We especially invite applications from doctoral students and postdoctoral scholars who currently have no funding from their home institutions. The fellowships are usually granted for periods of one to five months but, in exceptional cases and depending on the availability of funds, they can be extended by one month.

**Laura Bassi Scholarships**
The Laura Bassi Scholarship was established by Editing Press in 2018 with the aim of providing editorial assistance to postgraduates and junior academics whose research focuses on neglected topics of study, broadly construed, within their disciplines. The scholarships are open to every discipline and are awarded three times per year: December, April, and August. The value of the scholarships are remitted through editorial assistance as follows: Master's candidates: $750; Doctoral candidates: $2,500; Junior academics: $500. These figures reflect the upper bracket of costs of editorial assistance for master’s theses, doctoral dissertations, and academic journal articles, respectively. All currently enrolled master's and doctoral candidates are eligible to apply, as are academics in the first five years of their employment.

**NACADA: The Global Community for Academic Advising Research Support Grant for Academic Advising**
NACADA research support is intended to facilitate research related to academic advising. Quantitative, qualitative, or mixed methodologies are welcome, as is research from a variety of disciplinary perspectives. Program assessment is not funded. Successful proposals will clearly describe the development, implementation, analysis, and reporting of rigorous inquiry that investigates academic advising’s impact, context, or theoretical basis. The impact of academic advising on students and institutions, such as measurement of advising’s impact on particular student populations or on institutional goals (such as retention or program implementation) or analysis of the impact of particular advising practices, models, or organizational structures on student learning and development. The context of academic advising, which may include examination of institutional and cultural conditions that have an impact on student academic decision-making, institutional support, or reward and recognition of advising. The theoretical basis of academic advising development and practice, including evaluation or analysis of advising-based theory from philosophical/theoretical perspectives informed by a variety of disciplines.

Max Planck Institute for Demographic Research (MPIDR) PhD Student Position

The Max Planck Institute for Demographic Research (MPIDR) is inviting applications from qualified and highly motivated students for a PhD student position in the Lab of Digital and Computational Demography. The MPIDR is one of the leading demographic centers in the world. It is part of the Max Planck Society, a network of more than 80 institutes that form Germany’s premier basic-research organization. Max Planck Institutes have an established record of world-class research and they offer a unique environment that combines the best aspects of an academic setting and a research laboratory. The Lab of Digital and Computational Demography, headed by MPIDR Director Emilio Zagheni, is looking for candidates with strong quantitative and programming skills and with research interests in inequalities in mortality. The starting date is flexible, but no later than November 1, 2022. The PhD student is offered a 3-year contract with remuneration based on the salary structure of the German public sector, currently starting at 34,295.22 € gross a year.

National Geographic Explorer Grants

National Geographic offer several grants, with various entry points, to provide a dynamic pathway to join our community and engage with us. Whether you are a budding Explorer or a luminary in the field, each opportunity has unique criteria and benefits to ensure that our Explorers receive support and funding aligned to their specific needs and goals. A small number of grants are open to individuals beginning their National Geographic journey and those who are working on more advanced projects. Focus areas include Ocean, Land, Wildlife, Human History and Cultures, and Human Ingenuity.

Sci-Founder Fellowship (PhD graduates and postdocs) for Startups

The Sci-Founder Fellowship program will help scientists create a startup company of their own, invest $400,000 per company, and mentor the founders. The ultimate goal is to get the teams to a stage where they can raise seed funding from investors on their own (we will introduce them to investors from our network). Sci-Founder will take equity in the formed entity but no ownership of any intellectual property. The IP will stay with the inventor/institution and is normally licensed from the institution to the formed company. We are not planning to go through a lengthy application process that involves business plan or pitch competitions, and the involvement of external mentors. We want to help scientists to get started right away to work on their ideas by offering
sufficient start capital and hands on mentorship on how to build their company the right way.

**Sigma Xi, The Scientific Research Honor Society Grants-in-Aid of Research (GIAR) Program**

The Sigma Xi Grants in Aid of Research (GIAR) program has provided undergraduate and graduate students with valuable educational experiences since 1922. By encouraging close working relationships between students and mentors, the program promotes scientific excellence and achievement through hands-on learning. The program awards grants of up to $1,000 to students from most areas of the sciences and engineering. Designated funds from the National Academy of Sciences allow for grants of up to $5,000 for astronomy research and $2,500 for vision related research

**Education Pioneers Impact Fellowship**
The Fellowship’s work placement embeds you within a school district, charter school, nonprofit, government agency, or other education organization in one of 13 metro regions across the country to tackle a strategic data or project management challenge. Working in a high-stakes, complex sector like education requires thoughtful leadership. Being an effective education leader also requires being conversant and credible in the matters that impact schools and communities directly. Through the Impact Fellowship’s 10 months of robust leadership development programming, EP Fellows gain exposure to the issues, policies, and politics that are critical for a transformational career in education. Through workshops and professional development opportunities in cohorts throughout their Fellowship, Fellows learn about the need for and impact of transformational leadership across local and national education landscapes and dive deeply into the persistent opportunity gap and the roots of inequity in our current system while building your orientation to people-centered and inclusive leadership practices.

- **Deadline:** April 26, 2022
- **Citizenship:** International students are eligible to apply only if they are authorized to work in the United States and do not require any visa assistance.

**Endangered Language Fund (ELF) Language Legacies Grant Program**
The Language Legacies grant program supports documentation and revitalization efforts throughout the world. The Endangered Language Fund provides grants for language documentation and revitalization, and for linguistic fieldwork. The work most likely to be funded is that which serves both the native community and the field of linguistics, although projects which have immediate applicability to one group and more distant applicability to the other will also be considered. Support for publication is a low priority, although it will be considered. Proposals can originate in any country. The language involved must be in danger of disappearing within a generation or two. Endangerment is a continuum, and the location on the continuum is one factor in our funding decisions. Eligible expenses include consultant fees, equipment, travel, etc. Overhead is not allowed. Grants are for one year and average around $2,000 (US).

Wenner-Gren Dissertation Fieldwork Grants in Anthropology
Dissertation Fieldwork Grants are awarded to aid doctoral or thesis research. The program contributes to the Foundation's overall mission to support basic research in anthropology and to ensure that the discipline continues to be a source of vibrant and significant work that furthers our understanding of humanity's cultural and biological origins, development, and variation. The Foundation supports research that demonstrates a clear link to anthropological theory and debates, and promises to make a solid contribution to advancing these ideas. There is no preference for any methodology, research location, or subfield. The Foundation particularly welcomes proposals that employ a comparative perspective, can generate innovative approaches or ideas, and/or integrate two or more subfields.

American Society of Civil Engineers (ASCE) Jack E. Leisch Memorial National Graduate Fellowship
The fellowship is a memorial to the outstanding professional accomplishments and contributions of Jack E. Leisch, M. ASCE to the fields of highway design, traffic
operations and transportation planning. The fellowship is supported by the income from
donations in Mr. Leisch's honor. The award consists of a certificate and a monetary
payment of approximately $6,000. The fellowship will apply to the pursuit of full-time
studies in eligible academic programs in highway design, traffic operations, roadway
safety, and transportation planning with the emphasis on highway design and traffic
operations including ITS and influence of Autonomous Vehicles on highway design and
traffic operations.

**Association of Professional Dog Trainers (APDT) Foundation Grants**
The mission of the APDT Foundation is to provide funding for applied scientific
research on dog training and behavior and to further increase the knowledge base of the
dog training profession. The corporation is organized for charitable and educational
purposes within the meaning of 501(c)3 of the Internal Revenue Code of 1986. The
APDT Foundation will support undergraduate, graduate, and faculty academic research
in a field related to applied behavior, including behavior analysis, ethology, and
cognition. Preference will be given to proposals that contain research questions that will
have practical application for professional dog trainers and behavior consultants.
Preference will also be given to proposals that include collaboration with the dog
training and behavior community, specifically companion dog trainers who work with
dog owners. We will also accept proposals that create canine science outreach and
education opportunities.

**CDC Epidemiology Elective Program (EEP) for Medical and Veterinary Students**
The Centers for Disease Control and Prevention (CDC) seeks medical and veterinary
students for the CDC Epidemiology Elective Program (EEP) to applied epidemiology,
public health, and global health. Students learn by gaining hands-on experience and
mentorship from CDC subject matter experts. This program offers 6- or 8-week rotations based at CDC sites, other federal sites, and state, Tribal, local, and territorial health departments. Assignments may involve conducting surveillance of a disease, injury, or other health condition; analyzing health data to identify new risk factors for disease; assisting CDC’s EIS officers and other public health professionals in the field to investigate an outbreak; and contributing to CDC publications and guidelines of major public health importance.

### Crop Science Society of America – Crop Science Graduate Student Scholarship

The scholarship is provided to a meritorious graduate student in crop science. The scholarship is supported by gifts from the Gerald O. Mott family to the Agronomic Science Foundation (ASA) and administered by the Crop Science Society of America (CSSA). Nominees will have completed at least one year of graduate work leading to a M.S. or Ph.D. degree in a field of emphasis within any of the CSSA divisions. Nominees are required to be CSSA or ASA members. The award allows self-nominations. In 2022, CSSA will award 1 scholarship at $2,000.

### Department of Energy Minority Educational Institution Student Partnership Program-Summer

The MEISPP is offered through the Department of Energy Office of Economic Impact and Diversity (ED). The MEISPP is designed to provide talented undergraduate and graduate students with internships that introduce them to a variety of entry and mid-level research, technical and professional positions within the U.S. Department of Energy (DOE) and its national laboratories. Interns will help support the DOE mission of discovering solutions to power and secure America’s future. Opportunities for many majors and interests including: science, technology, engineering, mathematics, business, policy and law.

- **Citizenship:** U.S. Citizen

### Department of Energy Office of Science Graduate Student Research (SCGSR) Program

The goal of the Office of Science Graduate Student Research (SCGSR) program is to prepare graduate students for science, technology, engineering, or mathematics (STEM) careers critically important to the DOE Office of Science mission, by providing graduate thesis research opportunities at DOE laboratories. The SCGSR program provides supplemental awards to outstanding U.S. graduate students to pursue part of their
graduate thesis research at a DOE laboratory in areas that address scientific challenges central to the Office of Science mission. The research opportunity is expected to advance the graduate students’ overall doctoral thesis while providing access to the expertise, resources, and capabilities available at the DOE laboratories. We would like to bring to your attention 4 transdisciplinary research areas for encouraging graduate training activities at the convergence of multiple disciplines and communities, including Microelectronics, Data Science, Conservation Laws and Symmetries, and Accelerator Science. We strongly encourage applications in these areas. The award period for the proposed research project at DOE laboratories may range from 3 to 12 consecutive months.

**Food and Agricultural Sciences National Needs Graduate and Postgraduate Fellowship (NNF) Grants Program**

This grant program supports: (1) training students for master's and doctoral degrees in food, agricultural and natural resource sciences; and (2) Special International Study or Thesis/Dissertation Research Travel Allowances (IRTA) for eligible USDA NNF beneficiaries. Awards are specifically intended to support traineeship programs that engage outstanding students to pursue and complete their degrees in USDA mission areas. Applicants provide clarity about the philosophy of their graduate training, and relevance to USDA mission sciences, NIFA priorities and national science education policies and statistics. Applications are being solicited from institutions that confer a graduate degree in at least one of the following Targeted Expertise Shortage Areas: 1) animal and plant production; 2) forest resources; 3) agricultural educators and communicators; 4) agricultural management and economics; 5) food science and human nutrition; 6) sciences for agricultural biosecurity; and 7) training in integrative biosciences for sustainable food and agricultural systems.

UA Space Grant Graduate Fellowships
The UA/NASA Space Grant Program and nominating departments provide six graduate fellowships per year to exceptional graduate students interested in promoting the understanding of space-related research to the public and who are studying in space sciences/engineering, public policy, earth sciences, science education, and global change-related fields. Space Grant fellows are required to complete an educational outreach project as part of their fellowship. In keeping with National Space Grant College and Fellowship Program goals, Space Grant Fellows will develop a project that promotes the understanding of space-related research to the public. Successful applicants tend to establish a relationship with an organization or institution (i.e. a school, museum, park/forest, or an existing educational program) as they develop their outreach project proposal. It is essential that applicants identify an "educational outreach advisor" representing this organization or program who will provide an initial letter of support that indicates their willingness to cooperate with the applicant's proposal and help in evaluating the project during the fellowship period.

Postdoctoral Opportunities

American Society of Human Genetics (ASHG) Fellowships
The American Society of Human Genetics (ASHG) and the National Human Genome Research Institute (NHGRI) co-sponsor two fellowships annually to support early-career genetics and genomics professionals with an advanced degree who wish to make a career transition. The **Genetics & Public Policy Fellowship**, offered annually since 2002, is designed for individuals interested in the development and implementation of genetics-related health and research policies at a national level. The fellow will have the opportunity to participate in policy analysis at NHGRI and ASHG, and to work directly within the U.S. Congress. The **Genetics Education & Engagement Fellowship** is designed for individuals interested in developing and implementing genetic and genomic literacy, engagement, diversity, and/or professional development initiatives for K-12, undergraduate, graduate, post-graduate, and professional audiences. The fellow will participate in rotations at NHGRI and ASHG, and typically a third organization involved in genetic and genomic literacy, engagement, diversity, or professional development.

- **Deadline:** April 20, 2022

Brooke Hindle Postdoctoral Fellowship in the History of Technology
The Brooke Hindle Postdoctoral Fellowship in the History of Technology honors the contribution of Brooke Hindle to the work of the Society for the History of Technology. The Fellowship, made possible thanks to the great generosity of his family, is for $10,000 and may be used, as further detailed below, for any purpose connected with research or writing in the history of technology for a period of not less than three months during the calendar year following the award. Applicants must hold a doctorate in the history of technology or a related field. The proposal must be in a field related to the history of technology. Applicants should be intending either to prepare a dissertation for publication as articles or as a monograph, or to develop a new project based on primary research.

- **Deadline:** Application will open soon; due date TBD, likely mid-April

Cancer Research Institute (CRI) Irvington Postdoctoral Fellowships
The Cancer Research Institute (CRI) recognizes that getting to the next great breakthrough in cancer treatment will require continued investment in fundamental research and training. CRI therefore invites postdoctoral fellows working in both fundamental immunology and tumor immunology to apply for funding. The CRI Irvington Postdoctoral Fellowship Program is CRI’s longest-standing continuous program. Postdoctoral fellowships provide support to fund and train young immunologists and cancer immunologists at top universities and research centers around the world. Fellows work and continue their training under the guidance of a world-renowned immunologist, who mentors the fellow and prepares him or her for a productive and successful career in cancer immunology. Fellows receive up to $186,000 over three years to cover the cost of salary, insurance, and other research-related expenses, such as travel to conferences and meetings. The institutional allowance can also be used for childcare.

Duke University’s Center for Advanced Genomic Technologies Postdoc Opportunity
The Center for Advanced Genomic Technologies (CAGT) is a collaborative network of researchers working to develop the missing technologies and analytical approaches needed to both understand the tangled genetic webs underpinning human disease and discover new drug targets and gene therapies to fight them. Creating Outstanding Opportunities for Postdoctoral Trainees (COOPT) in Genomic Technologies invites a group of prospective postdocs to share brief presentations of their own research, learn about exciting projects currently underway in CAGT, meet with current trainees, and explore future research opportunities in labs of interest during 1:1 discussions.

Harvard Medical School Dean's Postdoctoral Fellowship Program

The Dean’s Postdoctoral Fellowship (DPF) is a two-year research fellowship that was established in 2012 to nurture, advance, and retain a diverse scientific workforce who will continue to contribute to diversity through their ongoing academic and research scholarship. The fellowship program prepares scientists from groups historically underrepresented in the basic and social sciences for careers in academia and other sectors. Fellows benefit from a highly innovative and creative research environment that emphasizes scientific rigor, collaboration, and the pursuit of excellence in science. The two-year fellowship provides funding in the amount of $50,000/year, and DPF fellows are eligible for Harvard’s generous benefits package. They receive additional opportunities for career enhancement, mentorship, seminars, workshops, and conferences, along with a robust support network, through the Scholars in Translational and Academic Research program.

Hunt Postdoctoral Fellowships

Hunt Postdoctoral Fellowships (writing) provide up to $40,000 towards the writing-up of already completed research. The fellowship is awarded to early career scholars, who frequently lack the time and resources they need to publish their work. Applicants should be no more than ten years beyond their PhD, with allowances made for periods of caregiving, and have a doctorate in anthropology or an equivalent field. A maximum of eight Hunt Postdoctoral Fellowships are awarded annually. By providing funds for scholars to devote themselves full-time to writing, the Foundation aims to enable a new generation of scholars to publish significant works that will impact the development of anthropology. You can apply regardless of your departmental or professional affiliation. However, funding decisions are made on the basis of the potential of the project to make a significant contribution to the field of theoretical anthropology.

JDRF Postdoctoral Fellowships in Type 1 Diabetes Research

Postdoctoral fellowships are designed to attract qualified, promising scientists entering their professional career in the T1D research field. The applicant is required to work with a sponsor who can provide a training environment conducive to beginning a career in type 1 diabetes-relevant research. At the time of activating the award, the applicant must have a doctoral degree (PhD, MD, DMD, DVM), or the equivalent from an accredited institution and must not be simultaneously serving an internship or residency.
**John and Polly Sparks Early Career Grant for Psychologists Investigating Serious Emotional Disturbance (SED)**

The John and Polly Sparks Early Career Grant supports early career psychologists conducting research in the area of early intervention and treatment for serious emotional disturbance in children. The John and Polly Sparks Foundation partnered with American Psychological Foundation (APF) to empower early career psychologists to produce scientifically-based research and programs that could provide models for broad-based applications across the country. Applicants must be an early career psychologist (no more than 10 years post-doctoral with a degree from an accredited university).

**National Endowment for the Humanities Fellowships**

The National Endowment for the Humanities (NEH), a federal agency in Washington, D.C., administers a fellowships program that provides financial support for individuals who wish to pursue scholarly research projects in the humanities. Projects should involve advanced research that is of value to scholars, general audiences, or both. Fellowships provide recipients time to conduct research or to produce books, monographs, peer-reviewed articles, e-books, digital materials, translations with annotations or a critical apparatus, or critical editions resulting from previous research. Projects may be at any stage of development. NEH invites research applications from scholars in all disciplines, and it encourages submissions from independent scholars and junior scholars.

**Oak Ridge Institute for Science and Education List of Postdocs in National Labs and Federal Research Facilities**

If you are a recent doctoral graduate and would like to obtain additional training within your field of study, the Oak Ridge Institute for Science and Education (ORISE) offers postdoctoral fellowships and research opportunities at national laboratories and federal research facilities nationwide. For scientists who have recently completed their Ph.D. in a science-related discipline, a postdoc research fellowship can make an excellent start to a career at a DOE national laboratory or other federal research facility. ORISE sponsors postdoctoral research programs across the United States, many of which have immediate openings for qualified candidates.

**Society for the Psychological Study of Social Issues (SPSSI) Grants-in-Aid Program (graduate students and postdocs)**
The SPSSI Committee on Grants-in-Aid (GIA) wishes to support scientific research in social problem areas related to the basic interests and goals of SPSSI and particularly those that are not likely to receive support from traditional sources. The Committee especially encourages proposals involving (a) unique and timely research opportunities, (b) underrepresented institutions, graduate students, and junior scholars, (c) volunteer research teams, and (d) actual, not pilot, projects. Funding up to $1000 is available for graduate student research. In the case of graduate students, strong preference is given to applications from students at the dissertation stage of their career. Funding up to $2000 is available for research by SPSSI members who already have a Ph.D. Applicants can be at any stage of their academic work at any type of institution.

**Thrasher Research Fund Early Career Award Program**
The Fund recognizes that young investigators may find it difficult to remain in pediatric research because of a lack of funding. Therefore, the purpose of this program is to encourage the development of medical research in child health by awarding small grants to new researchers, helping them gain a foothold in this important area. The goal is to fund applicants who will go on to be independent investigators. The Fund will make up to 30 awards total with two funding cycles (15 awards each). The Fund is open to a wide variety of research topics. In the Early Career Award Program, the Fund is particularly interested in applicants that show great potential to impact that field of children's health through medical research.

**Zuckerman STEM Leadership Program Postdoctoral Scholars Program**
The Zuckerman Postdoctoral Scholars Program attracts high-achieving postdoctoral scholars from premier universities in the United States and Canada to do research at one of seven Israeli universities. Once they complete their research, many Zuckerman postdocs are expected to accept faculty positions at top North American universities, weaving a network of academic collaboration and goodwill that will greatly benefit US-
Israeli scientific cooperation. Zuckerman Scholars enjoy unique programming and activities organized especially for them by their host universities and the Zuckerman Institute in Israel, including touring, educational experiences, and social programs. These activities are designed to strengthen the scholars’ knowledge of and connection to Israel, and cultivate an esprit de corps, exchange of ideas, and foster new relationships. Five postdoctoral scholarships will be given out per participating university for the 2021-2022 academic year in two tracks. Postdoc at an Israeli University Track: A two-year postdoctoral scholarship where scholars conduct research exclusively at one of 7 participating Israeli universities. If circumstances allow, Zuckerman Postdoctoral scholarship may be renewed on a competitive basis for an additional one or two year. Joint US-Israel Postdoc Track: A two-year joint postdoctoral scholarship where scholars spend half their time at one of 7 participating Israeli universities, and the other half at a US or Canadian university. Scholars in this track can decide how to divide their time.

- **Deadline:** March 31, 2022
- **Citizenship:** U.S. or Canadian citizenship or have a documented status that allows them to study and work in the US.
