March GradFunding - American Bus Association, National Geographic, NASA, and more

Dear Graduate Students,

We recently heard from an amazing student who did not receive the award for which she applied. While not getting an award seems normal to us in the Office of Fellowships, it is not normal for the person who put so much effort and time into the application. In our fellowship success stories, we encourage the writers to talk about the times they did not get the award as well as when they did. Every single writer has had many “failures” before their “successes.” If you have not gotten awards in the past, we encourage you, when you find a good fit, to try again. You will become a stronger writer, make new connections, solidify your plans, and you might even get funded.

Shelley and Bethany

DAAD Information Session for Study in Germany
If you have any interest in research or study in Germany, the DAAD is an excellent source of funding. We will cover the various opportunities and timelines for applications. DAAD Fellowships provide support for study in Germany. Each year, the University of Arizona facilitates the selection of one priority candidate. Applicants from
the UA are not required to submit for priority candidacy; applying for the priority candidacy is optional and students can apply individually to the DAAD’s various programs.

**General Funding Opportunities**

**American Bus Association Academic Merit Scholarships in Transportation, Travel, and Tourism**
The ABA Foundation mission is to support the motorcoach travel and tour industry with research and scholarships that benefit the ABA, policymakers and the public. Academic Merit Scholarships are open to both ABA and non-ABA Members. You must be a freshman, sophomore, junior, senior, or graduate student at an accredited university (4-year university/college or junior college). You must have a declared major or course of study relevant to the transportation, travel, and tourism industry. Transportation, travel, and tourism encompass a varying range of professions from accounting to hospitality management and everything in between. In other words, please apply rather than ruling yourself out because of your major. However, you will be required to submit a short essay on how your major or course of study is relevant to the transportation, travel, and tourism industries. You must maintain a minimum GPA of a 3.4 on a 4.0 scale.

German Historical Institute Doctoral and Postdoctoral Fellowships
The GHI awards short-term research fellowships to European and North American doctoral students as well as postdoctoral scholars to pursue research projects that draw upon primary sources principally located in North America. We are particularly interested in research projects that fit into the following fields: German and European history, The history of German-American relations, The role of Germany and the USA in international relations, North American history and Pan American, including Mexico, Central America, and the Caribbean (European doctoral and postdoctoral scholars only). The proposed research projects should make use of historical methods and engage with the relevant historiography. We especially invite applications from doctoral students and postdoctoral scholars who currently have no funding from their home institutions. The fellowships are usually granted for periods of one to five months but, in exceptional cases and depending on the availability of funds, they can be extended by one month.

- **Deadline:** April 1, 2023
- **Citizenship:** Unspecified. Language suggests it is institution-based: “Applicants should be based at (or recent graduates of) a North American or European university or research institute.”

**Laura Bassi Scholarships**  
The Laura Bassi Scholarship was established by Editing Press in 2018 with the aim of providing editorial assistance to postgraduates and junior academics whose research focuses on neglected topics of study, broadly construed, within their disciplines. The scholarships are open to every discipline and are awarded three times per year: December, April, and August. The value of the scholarships are remitted through editorial assistance as follows: Master’s candidates: $750; Doctoral candidates: $2,500; Junior academics: $500. These figures reflect the upper bracket of costs of editorial assistance for master’s theses, doctoral dissertations, and academic journal articles, respectively. All currently enrolled master’s and doctoral candidates are eligible to apply, as are academics in the first five years of their employment.
NACADA: The Global Community for Academic Advising Research Support Grant for Academic Advising

NACADA research support is intended to facilitate research related to academic advising. Quantitative, qualitative, or mixed methodologies are welcome, as is research from a variety of disciplinary perspectives. Program assessment is not funded. Successful proposals will clearly describe the development, implementation, analysis, and reporting of rigorous inquiry that investigates academic advising’s impact, context, or theoretical basis. The impact of academic advising on students and institutions, such as measurement of advising’s impact on particular student populations or on institutional goals (such as retention or program implementation) or analysis of the impact of particular advising practices, models, or organizational structures on student learning and development. The context of academic advising, which may include examination of institutional and cultural conditions that have an impact on student academic decision-making, institutional support, or reward and recognition of advising. The theoretical basis of academic advising development and practice, including evaluation or analysis of advising-based theory from philosophical/theoretical perspectives informed by a variety of disciplines.

Sci-Founder Fellowship (PhD graduates and postdocs) for Startups

The Sci-Founder Fellowship program will help scientists create a startup company of their own, invest $400,000 per company, and mentor the founders. The ultimate goal is to get the teams to a stage where they can raise seed funding from investors on their own (we will introduce them to investors from our network). Sci-Founder will take
equity in the formed entity but no ownership of any intellectual property. The IP will stay with the inventor/institution and is normally licensed from the institution to the formed company. We are not planning to go through a lengthy application process that involves business plan or pitch competitions, and the involvement of external mentors. We want to help scientists to get started right away to work on their ideas by offering sufficient start capital and hands on mentorship on how to build their company the right way.

**Creative Capital Awards for Artists**
Creative Capital provides grants to artists to support the creation of groundbreaking new art via a democratic, national, open call process. Innovation is our primary selection criterion, and our focus on championing groundbreaking projects and ideas distinguishes Creative Capital from other granting organizations. While selecting projects that are interesting, genre-stretching, and adventurous is at the core of our mission, we welcome multidisciplinary projects as well as projects that push boundaries within a single genre.

- **Deadline:** App opens in March (Film/Moving Image Category)
- **Citizenship:** U.S. citizens, permanent residents, and O-1 visa holders

**Endangered Language Fund (ELF) Language Legacies Grant Program**
The Language Legacies grant program supports documentation and revitalization efforts throughout the world. The Endangered Language Fund provides grants for language documentation and revitalization, and for linguistic fieldwork. The work most likely to be funded is that which serves both the native community and the field of linguistics, although projects which have immediate applicability to one group and more distant applicability to the other will also be considered. Support for publication is a low priority, although it will be considered. Proposals can originate in any country. The language involved must be in danger of disappearing within a generation or two. Endangerment is a continuum, and the location on the continuum is one factor in our funding decisions. Eligible expenses include consultant fees, equipment, travel, etc. Overhead is not allowed. Grants are for one year and average around $2,000 (US).

- **Deadline:** March 17, 2023

**Fundación Botín/Botín Foundation Arts Grants**
The Art Grants are intended to aid both training and the development of personal and research projects, which must be directly linked to artistic creation rather than to the development of a theoretical study. Specifically, the Fundación Botín offers six scholarships for artists of any nationality with an expected duration of nine months and an endowment of 23,000 euros each, in addition to medical insurance for recipients who need to travel to a country other than their country of residence. Of these six grants, one will be reserved in priority for an artist who is Spanish or resident in Spain (for at least five years immediately prior to applying for the grant), under 30 years of age, who wants to spend time abroad to continue their work, their studies or a residence.

Association of Professional Dog Trainers (APDT) Foundation Grants

The mission of the APDT Foundation is to provide funding for applied scientific research on dog training and behavior and to further increase the knowledge base of the dog training profession. The APDT Foundation will support undergraduate, graduate, and faculty academic research in a field related to applied behavior, including behavior analysis, ethology, and cognition. Preference will be given to proposals that contain research questions that will have practical application for professional dog trainers and behavior consultants. Preference will also be given to proposals that include collaboration with the dog training and behavior community, specifically companion dog trainers who work with dog owners.

CDC Epidemiology Elective Program (EEP) for Medical and Veterinary Students

The Centers for Disease Control and Prevention (CDC) seeks medical and veterinary students for the CDC Epidemiology Elective Program (EEP) to applied epidemiology, public health, and global health. Students learn by gaining hands-on experience and mentorship from CDC subject matter experts. This program offers 6- or 8-week rotations based at CDC sites, other federal sites, and state, Tribal, local, and territorial health departments. Assignments may involve conducting surveillance of a disease,
injury, or other health condition; analyzing health data to identify new risk factors for disease; assisting CDC’s EIS officers and other public health professionals in the field to investigate an outbreak; and contributing to CDC publications and guidelines of major public health importance.

**Crop Science Society of America – Crop Science Graduate Student Scholarship**
The scholarship is provided to a meritorious graduate student in crop science. The scholarship is supported by gifts from the Gerald O. Mott family to the Agronomic Science Foundation (ASA) and administered by the Crop Science Society of America (CSSA). Nominees will have completed at least one year of graduate work leading to a M.S. or Ph.D. degree in a field of emphasis within any of the CSSA divisions. Nominees are required to be CSSA or ASA members. The award allows self-nominations. In 2023, CSSA will award 1 scholarship at $2,000.

**Department of Energy Office of Science Graduate Student Research (SCGSR) Program**
The goal of the Office of Science Graduate Student Research (SCGSR) program is to prepare graduate students for science, technology, engineering, or mathematics (STEM) careers critically important to the DOE Office of Science mission, by providing graduate thesis research opportunities at DOE laboratories. The SCGSR program provides supplemental awards to outstanding U.S. graduate students to pursue part of their graduate thesis research at a DOE laboratory in areas that address scientific challenges central to the Office of Science mission. The research opportunity is expected to advance the graduate students’ overall doctoral thesis while providing access to the expertise, resources, and capabilities available at the DOE laboratories.

**Southern Arizona Environmental Management Society (SAEMS) Graduate Scholarships**
To encourage students planning to work in the environmental field or focus on solutions to environmental problems, each spring SAEMS awards scholarships to students pursuing a career in an environmental field. University of Arizona continuing undergraduate and graduate students in the Environmental, Health and Safety field may now apply for the Southern Arizona Environmental Management Society. This year, a total of at least $9,500 in scholarships will be awarded.

UA Space Grant Graduate Fellowships
The UA/NASA Space Grant Program and nominating departments provide six graduate fellowships per year to exceptional graduate students interested in promoting the understanding of space-related research to the public and who are studying in space sciences/engineering, public policy, earth sciences, science education, and global change-related fields. Space Grant fellows are required to complete an educational outreach project as part of their fellowship. In keeping with National Space Grant College and Fellowship Program goals, Space Grant Fellows will develop a project that promotes the understanding of space-related research to the public. Successful applicants tend to establish a relationship with an organization or institution (i.e. a school, museum, park/forest, or an existing educational program) as they develop their outreach project proposal. It is essential that applicants identify an "educational outreach advisor" representing this organization or program who will provide an initial letter of support that indicates their willingness to cooperate with the applicant's proposal and help in evaluating the project during the fellowship period.

Postdoctoral Opportunities

American Society of Human Genetics (ASHG) Fellowships
The American Society of Human Genetics (ASHG) and the National Human Genome Research Institute (NHGRI) co-sponsor two fellowships annually to support early-career genetics and genomics professionals with an advanced degree who wish to make a career transition. The **Genetics & Public Policy Fellowship**, offered annually since 2002, is designed for individuals interested in the development and implementation of genetics-related health and research policies at a national level. The fellow will have the opportunity to participate in policy analysis at NHGRI and ASHG, and to work directly within the U.S. Congress. The **Genetics Education & Engagement Fellowship** is designed for individuals interested in developing and implementing genetic and genomic literacy, engagement, diversity, and/or professional development initiatives for K-12, undergraduate, graduate, post-graduate, and professional audiences. The fellow will participate in rotations at NHGRI and ASHG, and typically a third organization involved in genetic and genomic literacy, engagement, diversity, or professional development.

- **Deadline:** April 20, 2022 - should open soon this month
- **Citizenship:** Applicants must be eligible to work in the U.S.

Cancer Research Institute (CRI) Irvington Postdoctoral Fellowships
The Cancer Research Institute (CRI) recognizes that getting to the next great breakthrough in cancer treatment will require continued investment in fundamental research and training. CRI therefore invites postdoctoral fellows working in both fundamental immunology and tumor immunology to apply for funding. The CRI Irvington Postdoctoral Fellowship Program is CRI’s longest-standing continuous program. Postdoctoral fellowships provide support to fund and train young immunologists and cancer immunologists at top universities and research centers around the world. Fellows work and continue their training under the guidance of a world-renowned immunologist, who mentors the fellow and prepares him or her for a productive and successful career in cancer immunology. Fellows receive up to $240,000 over three years to cover the cost of salary, insurance, and other research-related expenses, such as travel to conferences and meetings. The institutional allowance can also be used for childcare.

Duke University’s Center for Advanced Genomic Technologies Postdoc Opportunity
The Center for Advanced Genomic Technologies (CAGT) is a collaborative network of researchers working to develop the missing technologies and analytical approaches needed to both understand the tangled genetic webs underpinning human disease and discover new drug targets and gene therapies to fight them. Creating Outstanding Opportunities for Postdoctoral Trainees (COOPT) in Genomic Technologies invites a group of prospective postdocs to share brief presentations of their own research, learn about exciting projects currently underway in CAGT, meet with current trainees, and explore future research opportunities in labs of interest during 1:1 discussions.

Harvard Medical School Dean's Postdoctoral Fellowship Program
The Dean’s Postdoctoral Fellowship (DPF) is a two-year research fellowship that was established in 2012 to nurture, advance, and retain a diverse scientific workforce who will continue to contribute to diversity through their ongoing academic and research scholarship. The fellowship program prepares scientists from groups historically underrepresented in the basic and social sciences for careers in academia and other sectors. Fellows benefit from a highly innovative and creative research environment that emphasizes scientific rigor, collaboration, and the pursuit of excellence in science. The two-year fellowship provides funding in the amount of $50,000/year, and DPF fellows are eligible for Harvard’s generous benefits package. They receive additional opportunities for career enhancement, mentorship, seminars, workshops, and conferences, along with a robust support network, through the Scholars in Translational and Academic Research program.

**Hunt Postdoctoral Fellowships in Writing – Wenner-Gren Foundation**
Hunt Postdoctoral Fellowships (writing) provide up to $40,000 towards the writing-up of already completed research. The fellowship is awarded to early career scholars, who frequently lack the time and resources they need to publish their work. Applicants should be no more than ten years beyond their PhD, with allowances made for periods of caregiving, and have a doctorate in anthropology or an equivalent field. A maximum of eight Hunt Postdoctoral Fellowships are awarded annually. By providing funds for scholars to devote themselves full-time to writing, the Foundation aims to enable a new generation of scholars to publish significant works that will impact the development of anthropology. You can apply regardless of your departmental or professional affiliation. However, funding decisions are made on the basis of the potential of the project to make a significant contribution to the field of theoretical anthropology.

**JDRF Postdoctoral Fellowships in Type 1 Diabetes Research**
Postdoctoral fellowships are designed to attract qualified, promising scientists entering their professional career in the T1D research field. The applicant is required to work with a sponsor who can provide a training environment conducive to beginning a career in type 1 diabetes-relevant research. At the time of activating the award, the applicant must have a doctoral degree (PhD, MD, DMD, DVM), or the equivalent from an accredited institution and must not be simultaneously serving an internship or residency.

**John and Polly Sparks Early Career Grant for Psychologists Investigating Serious Emotional Disturbance (SED)**
The John and Polly Sparks Early Career Grant supports early career psychologists conducting research in the area of early intervention and treatment for serious emotional disturbance in children. The John and Polly Sparks Foundation partnered with American Psychological Foundation (APF) to empower early career psychologists to produce scientifically-based research and programs that could provide models for broad-based applications across the country. Applicants must be an early career psychologist (no more than 10 years post-doctoral with a degree from an accredited university).

National Endowment for the Humanities Fellowships
The National Endowment for the Humanities (NEH), a federal agency in Washington, D.C., administers a fellowships program that provides financial support for individuals who wish to pursue scholarly research projects in the humanities. Projects should involve advanced research that is of value to scholars, general audiences, or both. Fellowships provide recipients time to conduct research or to produce books, monographs, peer-reviewed articles, e-books, digital materials, translations with annotations or a critical apparatus, or critical editions resulting from previous research. Projects may be at any stage of development. NEH invites research applications from scholars in all disciplines, and it encourages submissions from independent scholars and junior scholars.

Oak Ridge Institute for Science and Education List of Postdocs in National Labs and Federal Research Facilities
If you are a recent doctoral graduate and would like to obtain additional training within your field of study, the Oak Ridge Institute for Science and Education (ORISE) offers postdoctoral fellowships and research opportunities at national laboratories and federal research facilities nationwide. For scientists who have recently completed their Ph.D. in a science-related discipline, a postdoc research fellowship can make an excellent start to a career at a DOE national laboratory or other federal research facility. ORISE sponsors postdoctoral research programs across the United States, many of which have immediate openings for qualified candidates.

Society for the Psychological Study of Social Issues (SPSSI) Grants-in-Aid Program (graduate students and postdocs)
The SPSSI Committee on Grants-in-Aid (GIA) wishes to support scientific research in social problem areas related to the basic interests and goals of SPSSI and particularly those that are not likely to receive support from traditional sources. The Committee especially encourages proposals involving (a) unique and timely research opportunities, (b) underrepresented institutions, graduate students, and junior scholars, (c) volunteer research teams, and (d) actual, not pilot, projects. Funding up to $1000 is available for graduate student research. In the case of graduate students, strong preference is given to applications from students at the dissertation stage of their career. Funding up to $2000
Thrasher Research Fund Early Career Award Program
The Fund recognizes that young investigators may find it difficult to remain in pediatric research because of a lack of funding. Therefore, the purpose of this program is to encourage the development of medical research in child health by awarding small grants to new researchers, helping them gain a foothold in this important area. The goal is to fund applicants who will go on to be independent investigators. The Fund will make up to 32 awards total with two funding cycles (16 awards each). The Fund is open to a wide variety of research topics. In the Early Career Award Program, the Fund is particularly interested in applicants that show great potential to impact that field of children’s health through medical research.

Zuckerman STEM Leadership Program Postdoctoral Scholars Program
The Zuckerman Postdoctoral Scholars Program attracts high-achieving postdoctoral scholars from premier universities in the United States and Canada to do research at one of seven Israeli universities. Once they complete their research, many Zuckerman postdocs are expected to accept faculty positions at top North American universities, weaving a network of academic collaboration and goodwill that will greatly benefit US-Israeli scientific cooperation. Zuckerman Scholars enjoy unique programming and activities organized especially for them by their host universities and the Zuckerman Institute in Israel, including touring, educational experiences, and social programs. These activities are designed to strengthen the scholars’ knowledge of and connection to Israel, and cultivate an esprit de corps, exchange of ideas, and foster new relationships. Five postdoctoral scholarships will be given out per participating university for the 2021-2022 academic year in two tracks. Postdoc at an Israeli University Track: A two-year postdoctoral scholarship where scholars conduct research exclusively at one of 7 participating Israeli universities. If circumstances allow, Zuckerman Postdoctoral scholarship may be renewed on a competitive basis for an additional one or two year. Joint US-Israel Postdoc Track: A two-year joint postdoctoral scholarship where scholars spend half their time at one of 7 participating Israeli universities, and the other half at a US or Canadian university. Scholars in this track can decide how to divide their time.

- **Deadline:** March 31, 2023 (3rd cycle)
• **Citizenship:** U.S. or Canadian citizenship or have a documented status that allows them to study and work in the US.
